

Alicja Maciejko

Architect / visual artist · Poland

Alicja Maciejko is an architect and visual artist whose practice operates at the intersection of architecture and art. A graduate of the Faculty of Architecture at Wrocław University of Science and Technology, she is an architect of the Polish Chamber of Architects and an assistant professor at the University of Zielona Góra. Her artistic practice extends architectural thinking into the field of visual art. In the Elements cycle, structure becomes an evolving relation between matter, space and perception.

PRACTICE

Maciejko approaches structure as a process rather than a finished form. Her works translate architectural logic into a visual language of balance, rhythm, tension and continuity.
