

ORAC Gallery

Gallery Profile · Chicago 2026

ORAC Gallery is an independent contemporary art gallery operating between Warsaw and Venice. Its programme combines solo and group exhibitions, long-term curatorial projects and selected international art-fair presentations.

The gallery works with artists across different generations and media, focusing on practices with a clear individual language and the capacity to sustain deeper curatorial, institutional and collector engagement. Its activity in Venice is developed in dialogue with A Space Gallery, creating a continuous programme between the two cities.

International presentations extend this work into new professional and collector contexts without reducing the gallery's programme to fair participation alone.

MINORIA: TEXIS

TEXIS names a temporary act of joining: distinct artistic languages, materials and ways of seeing brought into relation, each retaining its own autonomy.

“The space between works is not empty. It is where the exhibition begins - and where it continues after it has ended.”

— Monika Turczyńska, Curator
